§ 5 Severity Levels & Response time

This chapter explains the severity levels used by JDisc and their response time. The response time gets measured in JDisc business hours. JDisc business hours are starting from 9am to 5pm German timezone.

- **Critical:**
Catastrophic error causing irrevocable loss of data or damage to the hardware or software. The problem could result in large-scale failures that prevent many people from doing their work. Performance is so bad that the system cannot accomplish business goals.
Response time: 4 hours
- **High:**
Severe problem, causing possible loss of data. User has no workaround to the problem. Performance is so poor that the system is universally regarded as 'pitiful'.
Response time: 8 hours
- **Medium:**
Moderate problem causing no permanent loss of data, but wasted time. There is a workaround to the problem. Internal inconsistencies result in increased learning or error rates. An important function or feature does not work as expected.
Response time: 16 hours
- **Low:**
Minimal error. The problem is rare and causes no data loss or major loss of time. Minor cosmetic or consistency issue.
Response time: 24 hours

While our support engineers will make best efforts to resolve your issue, JDisc cannot guarantee to resolve all issues due to the diversity of our customers' network configurations.
